Vision & Objective

I'm an enthusiastic Java Developer, who enjoys being part of an innovative and creative team. Quick to adapt to new ideas as well as to the work environment. I'm also able to work well under significant pressure and to develop creative solutions to various problems. I want to establish a career within a challenging environment where I would be able to not only enhance my skills but also assist the company to achieve its own goal.

Professional Overview

- ▶ Creative, innovative; Easy learning; Likes to learn and teach;
- ▶ Quick adaptation; Quick programmer;
- ▶ Minimalist; Perfectionist;
- ▶ Pro-active with team work;
- ▶ Strong analytical skills;
- ▶ Experiences with Delphi, Java, C++, SQL, UML, HTML, JavaScript, CSS

Certificates/Courses

- ▶ IELTS – International English Language Testing System – Overall Grade: 6
- ▶ Sun Microsystems Education Courses (June 2007)
 - ▶ OO226 - Object-Oriented Analysis and Design Using UML
 - Describe the Object-Oriented Software Development process
 - Determine the system requirements
 - Analyze the functional requirements
 - Create system architecture
 - ▶ SL275 - Java Programming Language
 - Create Java technology applications that leverage the object-oriented features of the Java language, such as encapsulation, inheritance, and polymorphism
 - Use Java data types and expressions
 - Use Java flow control constructs

- ▶ SL285 - Java Programming Language Workshop
 - Develop classes to connect programs to SQL database systems using core aspects of JDBC
 - Apply design patterns to create reusable classes
 - Organize and set up infrastructure to support a Java technology project using SWING
 - Create remote objects using RMI
 - Create a multithreaded server

Professional History

Employer: XProcess Tecnologia da Informação, Aracaju, Brazil

Position: Software Analyst and Programmer

Employment: April 2006 – Jun 2007

Developing using a methodology similar to Extreme Programming focused in performance and results.

Achievements:

- ▶ Developer Role (creating solution to applications) achieved in 3 months (Jun 2006 - Jun 2007)
- ▶ Production Environment Management Role (updating and maintaining) achieved in 5 months (Aug 2006 – Jun 2007)
- ▶ Development of web application within 3 months course according to project's specifications, 2 months before deadline.
- ▶ Trained new employees for 3 months which were contracted to replace me before my departure

Responsible for:

- ▶ Developing and Testing Java Classes and Java Pages according to the client's process
- ▶ Implementing and creating page designs using HTML, JavaScript and CSS.
- ▶ Updating and maintaining the production environment
